

## APPS TO HELP YOU LEARN ON YOUR OWN

Recently, the number of Covid-19 cases has increased exponentially in Hong Kong, and the public health care system is on the brink of collapse. This is why our summer holiday has been moved earlier.

What apps can students use to continue learning during this time?

The first app I recommend is called Cake, which is helpful for those who want to improve their English on their own. Cake includes many videos with subtitles and example sentences, so people learn the correct pronunciation and usage of words.

The second app I recommend is called Forest - Your Focus Motivation. It is an app that teaches you to develop concentration. Every time you complete a concentration task, you can plant a small tree in the app. This can help you to be more motivated to maintain your focus.
